

# THE DRONE REGULATORY ENVIRONMENT

# 2

“OPEN”

FLIGHT CATEGORY

# THREE CATEGORIES DRONE OF FLIGHT

**OPEN**

**“ BUY & FLY ”**

**SPECIFIC**

Declaration  
or  
Operational authorisation  
or  
Light UAV Certificate (LUC)

**CERTIFIED**

Rules equivalent to  
manned aviation

What ever the category:  
**ALWAYS** make sure you **ALSO** comply with the Geo-Zone requirements

# New EU legislation as from January 1st

Including **automated** flights

## OPEN

- Low risk
- No operational authorisation or declaration required by operator before start of flight
- VLOS, 25kg MTOM, 120m AGL

Including **BVLOS** & **autonomous** flights

## SPECIFIC

- Increased risk
- Operational authorisation required by CA based on SORA
  - or Declaration suffices if Standard Scenario (STS-x)
  - or LUC self-authorisation

Think of Air Taxi's or Cargo over dense urban area

## CERTIFIED

- Risk as manned aviation
- Certified operator
- Certified UAS with CoA
- Licensed pilot

Whatever the category:  
there are minimum pilot competencies !

# EU legislation flight category details

Including **automated** flights

## OPEN

- Low risk
- No operational authorisation or declaration required by operator before start of flight
- VLOS, 25kg MTOM, 120m AGL

Including **BVLOS** & **autonomous** flights

## SPECIFIC

- Increased risk
- Operational authorisation required by CA based on SORA  
or Declaration suffices for Standard Scenario's (STS-x)  
or LUC with self-authorisation

Think of Air Taxi's  
or  
Cargo over dense urban area

## CERTIFIED

- Risk as manned aviation
- Certified operator
- Certified UAS with CoA
- Licensed pilot

# OPEN category : NEW EU LEGISLATION

- Low risk
- No operational authorisation or declaration required by operator before start of flight
- VLOS, 25kg MTOM, 120m AGL

Including  
**automated** flights

# OPEN category

No operational authorisation or declaration required

## UAS

<25kg MTOM with 3 possibilities:

- **C0, C1,C2,C3 or C4**
- **privately build**
- **certain (older) non-Cx drones**

## Operation

VLOS only (except follow-me or using UA observer)

Max 120m AGL

3 subcategories:

- **“over people” (A1),**
- **“close to people” (A2)**
- **“far from people” (A3)**

Not carry dangerous goods and no dropping of any material

Not over assemblies of people

# OPEN category

OPEN

Open A1/C0  
“Over people”

## Drone:

- C0 drone (by default <250g)
- privately build <250g
- Non Cx-compliant drone <250g  
(put on the market before January 1<sup>st</sup> 2024)

## Flight:

- You can fly over people (involved or not)
- No flying over “assemblies of people”

No need for operator registration (unless drone has a camera),  
no need for geo-awareness and remote-ID on the drone

# OPEN category

Open A1/C1  
“Over people”

## Drone:

C1 drone (by default <900g)

## Flight:

You can fly over involved people  
(= with explicit OK)

In case of unexpected flight over uninvolved people, the pilot shall reduce that time as much as possible

No flying over assemblies of people

Operator needs to be registered and the drone by default has geo-awareness and remote-ID

# OPEN category

Open A1/C1  
“Over people”

## DJI DRONE MAVIC 3

OPEN

### Flight:

You can fly over involved people  
(= with explicit OK)

In case of unexpected flight over uninvolved  
people, the pilot shall reduce that time as  
much as possible

No flying over assemblies of people

Operator needs to be registered and the drone by default has  
geo-awareness and remote-ID

# OPEN category

OPEN

**Open A2**  
**“Close to people”**

## Drone:

C2 drone (by default <4kg)

## Flight:

- You can fly over involved people (= with explicit OK)
- No flying over uninvolved people and keep horizontal distance of at least 30m from them, or distance of up to 5m when low-speed mode function is activated
- No flying over assemblies of people

Operator needs to be registered and the drone by default has geo-awareness and remote-ID

# OPEN category

Open A3

“Far from people”

OPEN

## Drone:

C2 drone (by default <4kg)

C3 drone (by default <25kg and <3m)

C4 aero-model drone (by default <25kg)

Privately build <25kg

Non-Cx compliant drones <25kg  
(put on the market before January 1<sup>st</sup> 2024)

## Flight:

- You can fly over involved people (= with explicit OK) but only fly in an area where the pilot reasonably expects that no uninvolved person will be **endangered**
- Keep a safe horizontal distance of 150m from residential, commercial, industrial or recreational areas

# OPEN category

OPEN

Open A3  
“Far from people”

- How do I make sure that no uninvolved person will be ***endangered?***

**AMC states this:**

*A minimum horizontal distance from the person that is passing the area could be estimated as follows:*

- (1) no less than 30 m;*
- (2) no less than the height ('1:1 rule', i.e. if the UA is flying at a height of 30 m, the distance of the UA from the uninvolved person should be at least 30 m), and*
- (3) no less than the distance that the UA would cover in 2 seconds at the maximum speed (this assumes a reaction time of 2 seconds).*

*This minimum horizontal distance is intended to protect people on the ground, but can be extended to property and animals.*

# OPEN category

OPEN

Open A3  
“Far from people”

- How do I make sure that no uninvolved person will be *endangered*?

1:1 rule with minimum of 30m

# OPEN category

## Pilot responsibility:

- **Explicit OK** from **all involved people** after risk briefing (otherwise they are consider 'uninvolved')
- Keep VLOS, eventually through help of an observer (e.g. FPV)
- Not fly close to or inside area where an emergency response effort is ongoing (unless approval)

# How about FPV?

OPEN

No worries, you're still flying VLOS for as long as there is an 'UA observer' standing next to you who helps you to keep the drone in his un-aided VLOS

# OPEN category overview

OPEN

**OPEN CATEGORY: not over assemblies of people; up to 120m above the ground\***  
**VLOS/EVLOS only, except in follow-me mode within 50m distance from pilot; not drop any material**

Operation		Remote pilot competency	UAS				UAS operator registration

# OPEN category, pilot competences

# OPEN category, pilot competences

# How about night flights?

- Drone needs to be equipped with green flashing light to be considered as VLOS
- Can be in Open category (with green light switched on), unless prohibited by GeoZone
- Definition: 'night' means the hours between the end of evening civil twilight and the beginning of morning civil twilight.

June 21<sup>st</sup> in Ghent: starts at 47min after sunset until 47 min before sunrise

# How about non-Cx-compliant drone? What if I still buy one tomorrow?

- You can fly in the OPEN category for as long as the drone will last, provided it was put on the market by the manufacturer before January 1st 2024, but only:
  - in the Open A1 category if MTOM < 250g
    - *you can fly over people (involved or not)*
    - *no flying over “assemblies of people”*
  - in the Open A3 category if MTOM < 25kg
    - *you can fly over involved people but only in an area where the pilot reasonably expects that no uninvolved person will be endangered*
    - *keep a safe horizontal distance of 150m from residential, commercial, industrial or recreational areas*
- Can fly in the Specific category if the technical characteristics comply with the Operational Authorisation

# How about non-Cx-compliant drone? What if I still buy one tomorrow?

- Up to 1/1/2024 a special 'Limited' Open category was created to temporarily allow you to fly in more than just the Open A1 (<250g) or Open A3 category:
  - In Open A1/C1 conditions if MTOM < 500g (in stead of 900g)
    - *You can fly over involved people*
    - *In case of unexpected flight over uninvolved people, the pilot shall reduce that time as much as possible*
    - *No flying over assemblies of people*
  - Keeping a safe horizontal distance of 50m from people (in stead of 30m) if MTOM < 2kg (in stead of 4kg)

# OPEN category overview for Belgium

OPEN

OPEN CATEGORY: not over assemblies of people; up to 120m above the ground*

# I have a Mavic Mini and I want to do take pictures for a real estate agency

- Drone is non-Cx-compliant and assuming MTOM = 249g

Open A1/C0

“you can fly over people”

Pilot needs to be familiarised with the user's manual

# I have a Mavic Air and I want to do take pictures for a real estate agency

- Drone is non-Cx-compliant and assuming MTOM = 430g

Limited Open A1

“you can fly over involved people but cannot intentionally fly over uninvolved people”

Pilot needs A1/A3 “Proof of completion of on-line theoretical knowledge examination”

# I have a Mavic 2 Pro and I want to do take pictures for a real estate agency

- Drone is non-Cx-compliant and assuming MTOM = 905g

Limited Open A2

“You need to keep a safe horizontal distance of 50m from all people ”

(AMC stipulates 1:1 rule)

Pilot needs A2 “Certificate of remote pilot competency”

# OPEN category

What if I cannot comply with all Open category conditions?

What if my flight meets none of the A1, A2 or A3 conditions?

ANSWER:

Your flight is to be categorized as SPECIFIC  
(or maybe even CERTIFIED)

# Open category “NEED TO KNOWS” BEFORE TAKE-OFF

# Applicability overview

# SUMMARY OF WHAT TO KEEP IN MIND

## NEED TO RESPECT

### Generic rules

### National GeoZones

- Aerodrome zones (incl. heliports)
- P/D/R + Military zones
- CTRs
- Seaports
- UAS test-zones
- ....

# SUMMARY OF WHAT TO KEEP IN MIND

## NEED TO RESPECT

### Generic rules

**No individual flight approval nor notification required**

### National GeoZones

**Individual flight approval and/or notification might be required**

- Aerodrome zones (non-military)
- P/D/R + Military zones
- CTRs
- Seaports
- UAS test-zones
- ....

# HAVE A SAFE FLIGHT

**Check your position on :**

**map.droneguide.be**

Check on that map which GeoZones overlap with your flightplan and list all of them in YOUR LIST of relevant GeoZones.

**Check each relevant Geozone**

For each GeoZone on YOUR LIST you will have to go and see who the GeoZone Manager is and what extra rules he imposes

**Comply with EACH Geozone**

Make sure you comply with all additional conditions for each zone (e.g. max flight height, drone requirements, ...)

**GET ALL YOUR FLIGHT AUTHORISATIONS**

Get all your authorisations from the different Geozone managers (if required)
